Turkey's leading flour producer Ulusoy Un continues to expand its operational geography with the power of support from you, our valuable investors. With our production facility in Hatay Antakya, where we bought the horse, we will not only increase our capacity to 4,200 tons/day, but also have the opportunity to supply products to the regions in the south of our country at a more affordable cost. We believe that this investment will further strengthen Ulusoy Un's dominance in the domestic market.

CHAIRMAN OF THE BOARD MESSAGE

Dear shareholders,

Turkey's leading flour producer Ulusoy Un continues to expand its operational geography with the power of support from you, our valuable investors. With our production facility that we purchased in Hatay Antakya, we will increase our capacity to 4,200 tons/day and we will have the opportunity to supply products to the regions in the south of our country at a more affordable cost. We believe that this investment will further strengthen Ulusoy Flour's dominance in the domestic market.

In the first quarter of 2023, our sales revenue reached TL 5.6 billion, increasing by 29% compared to the same period of the previous year. In the same period, our equity increased from TL 1.4 billion to TL 3.8 billion. Our company continues to increase its equity level in real terms with its investments and activities.

In the period we are going through, we see that the balances in the world grain market are very volatile due to the Russian-Ukrainian war that broke out in our region. The grain corridor agreement, which was made under the leadership of Turkey, gave a breath of fresh air to the world grain markets by enabling more than 30 million tons of grain to leave Ukraine through the corridor as of May 2023. There are question marks about the continuation of the grain corridor in the upcoming period. However, with the effect of increasing rainfall, we expect Turkey's upcoming harvest to result in a production higher than last year.

Thanks to both the practices of TMO and the strong licensed warehousing infrastructure in our country, we felt less war-induced price fluctuations compared to the world markets. Besides, we did not worry about not being able to reach the product even for one day. In this process, we once again fulfilled our role in food safety by keeping the products on behalf of all depositors, especially TMO, in the 169,000-ton warehouses of our licensed warehousing company Ulidaş, and then shipping them to the market.

On November 23, 2022, we bid farewell to our founder and honorary president, my precious Father Fahrettin Ulusoy. Under his leadership, Ulusoy Un transformed from a small grain shop into a global company. We will continue to walk on the path he opened, without compromising the values he taught us, with the same determination. I remember him with gratitude and gratitude for the great value he left us, may his soul rest in peace. As Ulusoy Group, we will ensure access to food by doing our part in the supply chain in the best way, by being with our nation and all the people of the world in the next process, as we have done so far. I would like to thank our esteemed investors, all stakeholders and employees who have not spared their faith and support in us throughout this process.

Eren Günhan ULUSOY
Chairman of the Board

“Our company continued its steady rise in the first quarter of 2023, with an equity figure of TL 3.8 billion, with an increase of approximately 2.7 times compared to the same period of the previous year.”

MESSAGE FROM THE CEO

Dear stakeholders,

Our company maintained its steady rise in the first quarter of 2023, with an equity figure of TL 3.8 billion, with an increase of approximately 2.7 times compared to the same period of the previous year.

We continue our investments as Turkey's leading flour producer and exporter with our strengthened equity. We accelerated our growth with Söke, Turkey's best-known flour brand, which we acquired in 2022.

Now, as Ulusoy Un, we bought a flour factory in Hatay Antakya Organized Industrial Zone, which has stopped production for a long time. With the commissioning of the facility, we aim to contribute to the economic development and employment of the earthquake zone. With new investments, we want to increase our capacity here and increase our presence and contribution in the region.

With this investment, the number of factories within Ulusoy Un increased to 5, while the total production capacity increased from 3.925 tons/day to 4.200 tons/day.

With our factories located in 5 different regions within our company, we will reach the active production capacity that will expand sales to all regions of Turkey.

With our renewable energy investments, we are moving towards our goal of both sustainable growth and carbon neutrality, while our production costs are significantly reduced.

On the other hand, we started to work to strengthen our corporate identity. With our 54 years of experience and our renewed world, we continue to create value for life.

I.5 Dividend Policy

From the revenues determined at the end of the operating period of the company, after deducting the amounts required to be paid or set aside by the company such as general expenses of the company and miscellaneous depreciation,

and the taxes required to be paid by the company's legal entity, the remaining period profit, which is seen in the annual balance sheet, is calculated below, after

deducting the previous year's losses, if any. It is distributed as shown: General Legal Reserve:
a) 5% of it is set aside as legal reserves.

First Dividend:

b) The first dividend is set aside from the remainder, if any, over the amount to be found by adding the donation amount made during the year, in accordance with the Turkish Commercial Code and the Capital Market Legislation.

c) After the above reductions are made, the General Assembly determines that the dividend is paid by the members of the board of directors and the civil servants.

Employees and workers, foundations established for various purposes and similar persons and institutions.

d) After deducting the amounts specified in sub-paragraphs (a), (b) and (c) from the net profit for the period, the General Assembly may distribute the remaining part, partially or completely, as the second dividend or reserve it voluntarily in accordance with Article 521 of the Turkish Commercial Code. is authorized to allocate as cash. General Legal Reserve:

One tenth of the amount found after deducting the 5% profit share from the portion decided to be distributed to the shareholders and other persons participating in the profit is added to the general legal reserve in accordance with the second paragraph of Article 519 of the TCC. Unless the reserves

required to be set aside by law are set aside, unless the dividend determined for the shareholders in the articles of association is distributed in cash and/or in the form of shares; It cannot be decided to allocate other reserves, to transfer profits to the following year, and to distribute dividends to

members of the board of directors, civil servants, employees and workers, foundations established for various purposes and such persons and/or institutions. The

dividend is distributed equally to all existing shares as of the distribution date, regardless of their issue and acquisition dates.

The distribution method and time of the profit that is decided to be distributed is decided by the general assembly upon the proposal of the board of directors. The dividend distribution decision made by the general assembly in accordance with the provisions of the articles of association cannot be revoked.

Our company's profit distribution policy; It has been adopted as a

result of the company's financial performance and market developments within the framework of the provisions in our Capital Markets Legislation and Articles of Association. Accordingly, 20% of the "consolidated net profit for the relevant period" calculated according to the periodic financial statements prepared in accordance with the International Financial Reporting Standards (IFRS) in accordance with the Capital Markets legislation, either in cash or by adding the relevant

amount to the company's capital as bonus shares. will be distributed as promissory notes, with a decision to be taken by the General Assembly of our Company. III.5.2 ANALYSIS OF NON-COMPLIANCE WITH THE CODE OF ETHICS

Those who violate the code of ethics or company policies and procedures will be subject to various disciplines, up to the extent that they are required to leave the job if necessary. Disciplinary

sanctions will also be applied to those who approve, direct or have knowledge of inappropriate behaviors and acts that cause violation of the rules, and do not make the necessary notification properly.

CHAPTER IV. BOARD OF DIRECTORS

IV.1 STRUCTURE, FORMATION AND INDEPENDENT MEMBERS OF THE BOARD OF DIRECTORS

Company; The Board of Directors, which consists of at least five (5) members and at most eleven (11) members, to be elected by the General Assembly within the framework of the provisions of the Turkish Commercial Code and the regulations of the Capital Markets Board, administers and represents. If the Board of Directors consists of five members, two members; three members if it consists of lower or seven members; If it consists of eight or nine members, four members, if it consists of ten or eleven members, five members are selected among the candidates nominated by the majority of the (A) group shareholders.

At least 2 independent members must be elected to the Board of Directors. The number of independent members cannot be less than 1/3 of the total number of members of the Board of Directors. The fractional digit is rounded up to the next integer. The number and qualifications of the independent members who will take office in the Board of Directors are determined according to the regulations of the Capital Markets Board regarding corporate governance principles. The Board of Directors is determined by the General Assembly in accordance with the provisions of the Turkish Commercial Code and other relevant legislation, without prejudice to the election of members, their terms of office, and the regulations introduced by the Corporate Governance Principles of the Capital Markets Board for independent members.

The Board of Directors elects a chairman and not less than one vice chairman or deputies from among its members each year. If one or more memberships are found to be vacant due to resignation, death or any other reason, a member of the Board of Directors is temporarily elected to submit these vacancies to the approval of the first General Assembly. Thus, the member elected to the Board of Directors will convene first.

He shall serve until the General Assembly Meeting and, if the election is approved by the General Assembly, completes the remaining term of the member to which he is appointed. In the event that independent members lose their independence, resign, or become unable to fulfill their duties, the regulations of the Capital Markets Board regarding corporate governance principles are complied with. Members of the Board of Directors may be elected to serve for a maximum of three (3) years and until their successors are elected. A member of the Board of Directors whose term of office has expired may be re-elected. For independent members, the General Assembly may change the members of the Board of Directors at any time, if it deems necessary, without prejudice to the regulations introduced by the Corporate Governance Principles of the Capital Markets Board.

RISK

MANAGEMENT

SECTORAL RISKS

Natural and Geographical Risks

The main natural risks in agricultural production are; hail, frost, fire, drought, storm and flood disaster.

Turkey has a great potential in both plant and animal production, but agricultural production cannot be increased to the desired level. In this context, with the effect of fluctuations in the supply-demand balance on prices, the Company's profit margins may fluctuate.

Due to the fact that production is largely dependent on natural conditions, there may be fluctuations in product yield, producer income and profitability.

In our country, there is a risk of product loss that may be caused by bacterial, fungal and viral plant diseases and damages.

Natural and geographical risks refer to risks that cannot be predicted and measured. However, in case of the occurrence of the events listed above, the Company closely monitors the expected regional and international product yields, and increases critical stock levels in order to be prepared for raw material price increases that may occur due to possible yield decreases. It also manages its risk by trading futures on commodity exchanges.

Political and Legal Risks

Since wheat, the main input of the Company, is directly affected by the state's agricultural policies, changes in the state's agricultural policies that may reduce the profit margin may have a negative impact on the company's profitability.

Problems in the global economy and possible fluctuations in product prices may negatively affect the agricultural sector. Due to the fact that production is largely dependent on natural conditions, there may be fluctuations in product yield, producer income and profitability.

The low profit margins of the sector and the dominance of the price-oriented competition approach may adversely affect the possible increases in general expenses and production costs, and decrease the level of sectoral profitability.

The company manages its sectoral political and legal risks with the same methods it applies to natural and geographical risks.

OPERATIONAL AND COMMERCIAL RISKS

Production Risks

It covers the process risks that may prevent the products from being made in the prescribed quality, content and standards.

In the process where wheat is processed as raw material, there is a risk of foreign materials mixing into the product produced, both at each stage and between stages, in the flow route where wheat turns into flour.

The risk of clumping, mold and infestation may be encountered in the nooks and crannies of production facilities, production crews and equipment, packaging-shipping and warehouses.

Breakage, deterioration, etc. in the main production machines. There may be a risk of stopping the production of problems caused by reasons. In the raw material input processes, foreign materials are kept away from the processes with magnets and garbage purifiers. Quality control is provided by various analyzes by taking samples from the products at certain stages.

The personnel are given continuous and regular training on these issues, and the cleaning and control processes are inspected with "scattered sampling and period" methods. In addition, critical control points are determined (Final Control Sieve and Metal Detector) to eliminate the risk at those points. Machinery maintenance and repair operations are carried out regularly, machine breakdowns are not expected for maintenance and repair and spare part replacements, and faults and malfunctions are promptly resolved by expert teams.

Comprehensive insurance policies have been drawn up against all kinds of machine breakdowns and breakdowns

Risks in Terms of Human Resources and Occupational Safety

Occupational health and safety risks due to possible occupational accidents and risks related to the inability to employ the workforce that is suitable for the job and will not disrupt the sustainability of the activities. Personnel trainings are carried out regularly against possible occupational accidents.

In addition, in accordance with the provisions of the current legislation, the necessary service is obtained from the Occupational Safety Specialist.

The Human Resources Department, established within the Company, continues to take effective measures against the risks of poor use of existing human resources and confusion in roles and responsibilities, making employee succession planning for critical roles and positions, and presenting the necessary reports and information to the management. Logistics Risks It covers operational risks in purchasing (supply), storage and shipping processes. There is a risk of encountering operational risks in the processes of dispatching the purchased raw materials to the warehouses of the Company, the duration of their holding in stock, and the shipment from the warehouses to production or sale. Loss, spillage, accident and etc. that may occur in all shipment processes of the Company.

Comprehensive insurance policies are available against risks. In addition, flood, fire, theft, etc. that may occur during storage. Insurance policies were also made against losses and damages. Adequate internal control mechanisms have been established, especially in the shipping and storage processes. Sales and Marketing Risks There is a risk that current account balances, checks-notes and similar bills received due to credit sales made to credit customers remain unrequited and cannot be collected.

There may be a risk of misconduct by the personnel assigned for collection in domestic fields. There is a risk that competitors will engage in aggressive competition practices in the domestic market and new players will enter the market.

Before making a credit (forward) sale, necessary market intelligence studies are carried out in accordance with the Company's risk policy, and a risk and limit amount is determined for the customers that are decided to work. In the ongoing activities, it is ensured to stay within the determined risk and limit limits. Audits are carried out according to scattered periods and samples by the inspectors assigned in the locations where the Company operates in domestic markets, and comprehensive insurance policies are issued against fraud attempts. There is always the risk of new players entering the market and existing players applying more aggressive sales policies, and the Company's Sales and Marketing Department closely monitors the developments in the domestic market against these risks.

Import-Related Risks

It covers all kinds of risks that may be experienced in the import markets. There is a risk of crisis, changes in production and tax policies that may be experienced in the markets of importing countries. The company determines and maintains critical stock levels against such negativities. World yield expectations are closely followed, and alternative import markets are constantly monitored and alternatives are kept in reserve. Comprehensive insurance policies are issued against logistic risks in import processes.

Risks Related to Export

It covers all kinds of risks that may occur in export markets. There are risks of anti-dumping practices, political, economic and cyclical instability and negativities in export countries. In particular, measures are taken against anti-dumping practices both by experts within the company and by professional organizations at the sectoral level. Against the risk of cyclical, political and economic crises that may be encountered in export markets, the Export Department of the Company continuously and vigorously researches export markets and keeps alternative markets in reserve.

FINANCIAL RISK

Exchange Rate and Interest Risk

It covers the risk of foreign currency

assets and liabilities being affected by exchange rate changes and the risks that may occur in costs and cash flow due to the increase in the interest rate applied to financial debts. Foreign currency risk arises from the foreign currency short position between the Company's foreign currency liabilities and assets. The fact that the liabilities in foreign currency exceed the assets creates a foreign currency short position. The company's foreign exchange open position is monitored and effectively managed by positions taken in the Futures Options Exchange and forward transactions with banks against any fluctuation risk, and it turns into predictable financial results. Position size is changed with the developments in the market and the hedging model applied. The Company's Finance Department closely monitors the market and considers alternative methods against the risk of an increase in variable interest rates in the use of short and long-term foreign resources.

Raw Material Price Change Risk

It covers the risk of price changes that may occur against the Company in wheat prices in internationally organized markets. Foreign currency risk arises from the foreign currency short position between the Company's foreign currency liabilities and assets. The fact that the liabilities in foreign currency exceed the assets creates a foreign currency short position. Wheat prices in our country are determined by TMO regulation. It intervenes in the market with different methods in order to protect the producer in price decreases and the consumer in increases. According to the physical wheat position in our stock; Risks are limited by performing partial hedging transactions on Cbot (Chicago Board of Trade) and Matif exchanges at levels where domestic wheat prices and foreign stock market price spreads are excessively widened.

Mr. Eren Günhan ULUSOY took the floor.

Distinguished attendee, esteemed meeting chairman, esteemed shareholders, thank you. The roots of our company go back to 1969 and our founding president was laid by our founding partner, Mr. Fahrettin ULUSOY. We have come to these days on these foundations, and today for the first time, we are in the bitterness of holding the General Assembly, which he could not attend due to his departure. But we, as both the Board of Directors and the employees, will work with all our efforts to carry this legacy he left us in the best way possible. We will further expand our activities in line with its principles. He was always advising us to protect our employment, to be entrepreneurs, to be useful to the country and the nation. We will continue to move forward on the path he has shown. In this context, our company's 2022 operating year has been recorded as the most successful year in the company's history, compared to previous years, within the framework of our publicly disclosed financial statements and annual reports. Our growth with both our operating profitability and sales revenue, as well as the public offering of Söke Değirmencilik A.Ş., our subsidiary, at the beginning of 2023, is the stock market of both the parent Ulusoy Un Sanayi and the subsidiary Söke Değirmencilik A.Ş. We shared this happiness together. We will continue to work and create value for the future of our company, our city and our country. I would like to thank our esteemed shareholders, shareholders, all our employees who have given us this trust, and our members of the board of directors who manage the company in this direction, both personally and on behalf of my company. Again, I commemorate our precious father with mercy and gratitude. I commemorate him with gratitude and mercy for dedicating his life to this, as he left us such a beautiful business to our country. I wish our 2022 general assembly to be a good one, thank you.

20- The twentieth item of the agenda has been passed. Since this item of the agenda is not subject to voting, voting was not done. It was asked whether there were any objections to the decisions taken by the Chairman of the meeting and to the meeting. No one objected. CORPORATE
SOCIAL
RESPONSIBILITY

Ulusoy Un 01.01.2023-31.03.2023
70 Faaliyet Raporu Being aware of Turkey's need for qualified manpower, Ulusoy Un takes its responsibility towards society, especially education; It carries out the projects it supports in the fields of sports, economy and culture.

Eren Günhan Ulusoy, Chairman of Ulusoy Un, who wishes to establish social responsibility as a corporate culture, is therefore a member of many social and professional associations. Since May 2015, he has been the Chairman of the Board of the Turkish Flour Industrialists' Federation, the umbrella organization of the flour industry sector.

He is also the Vice Chairman of the Board of the Black Sea Cereals, Pulses and Oilseeds Exporters' Association, Samsun Free Zone Isletici A.Ş. (SASBAŞ) is also a Member of the Board of Directors. In addition, he is the Chairman of the Eurasian Region Management Council of the International Millers Association (IAOM), the most rooted organization of the milling industry in the world.

Ulusoy Un, which carries out many social activities in the field of education, which is the most important step of social responsibility, in this direction, in the Atakum district of Samsun province, the founder of the company, Mr. He donated the 24 classroom primary school named after Fahrettin Ulusoy to the Ministry of National Education in 2009.

Contributing to the education of students who show the determination and determination to read, Ulusoy Un provides gratuitous scholarships and internship opportunities to dozens of students every year in order to make a difference in the knowledge and cultural level of the young generation that constitutes the

dynamic of the society. In addition, in order to maintain continuous cooperation with the university, our founder and chairman of the board of directors participate in meetings and conversations at the university, and at the same time, many department students visit our factory and closely follow the production processes.

Organizations with corporate social responsibility awareness have always been one step ahead in ensuring their success and continuity. With this awareness, it is beneficial to take advantage of the experience of non-governmental organizations in order to take the right steps.

For this reason, we make our social responsibility behavior more effective by benefiting from the experiences of non-governmental organizations in our projects. In addition, Ulusoy Un, which contributes to the education of students who show the determination and determination to read by ensuring the participation of our employees, customers and stakeholders in every step of our projects, gives gratuitous scholarships to dozens of students every year in order to make a little difference at the level of social dynamics.

Our founder and chairman of the board participate in the university and at the same time, food engineering students visit our factory and produce. Being aware of Turkey's need for qualified manpower, Ulusoy Un fulfills its responsibility towards the society with the projects it supports, especially in the fields of education.

Since 1998, she has been giving great support to children with leukemia and their families.

It has been a beacon of hope for more than 22 thousand children who have been treated for leukemia and cancer so far.

We, on the other hand, are regular donors of LÖSEV, which works without financial support from the state and survives with the support of the public.

We share with them the requested contributions as well as the cash supports in the works we carry out with the foundation's headquarters in Ankara and the Samsun branch.

Among the Design Skill Workshops included in the 2023 Education Vision Document published by the Ministry of National Education with the slogan "Happy Children, Strong Turkey", 9 Design and Skill Workshops in Atakum, İlkadım, Canik and Tekkeköy districts have been completed and put into service by us. With this, Tekkeköy Aşağıcınık Primary School, A **Fahrettin Ulusoy** Science Workshop House with 6 workshops was established.

From the first day after the earthquake disaster we experienced, we have been delivering aid to the region in coordination with official institutions. We delivered flour for bread making and ready-to-eat bakery products to the Earthquake Zone. We have provided the delivery of an industrial stove so that hot food can be served. We cooked products for those with Celiac Disease, among our earthquake survivors who settled in Samsun, and distributed them through authorized municipal officials.

Since its establishment, ZİÇEV has provided education and rehabilitation services to tens of thousands of mentally handicapped individuals and their families without age restrictions. As Ulusoy Un, we are happy to be with disadvantaged individuals and families and to benefit the society with all our strength by providing food support to ZİÇEV.

As Ulusoy Un, it is of great importance for us to support women's vocational training and employment. We believe that a strong society is possible with strong women. With this belief, we aim to both increase women's employment and contribute to the production power of our country with the food support we provide to the Public Education Centers in different districts in Samsun for students who continue their vocational education in pastry-cooking courses.

In addition to the individual support we give to those in need, we also regularly support women's guest houses, non-governmental organizations and the educational institutions we have determined, with food aid, especially flour.

We are proud of the achievements of the Amazon Orienteering and Outdoor Sports Club, which we support, and we are very happy to be with our young athletes.

As Ulusoy Un, it is in our yeast to produce value for life. We think that one of the biggest investments we can make in the future of our country is the education of our youth and we continue to support their education. We are happy to have given scholarships to 505 students in total between 2015-2022 and to contribute to their education by giving scholarships to 161 students in the 2022-23 academic year.
