ABOUT US

Ulusoy Un Sanayi ve Ticaret Anonim Şirketi was established in 1989 to produce, trade, import and export all kinds of food products, such as flour, semolina, pasta and biscuits, produced with grains and legumes. The primary business activity of Ulusoy Un is domestic and foreign trade of various grains, particularly wheat as well as production, trade, domestic and foreign sales of wheat flour, bran and other feed raw materials.

The Company has two factories (208.000 tons/year flour production) with total wheat processing capacity of 900 tons/day; one in Samsun with 500 tons/day capacity and one in Çorlu with 400 tons/day capacity and silo, warehouses, free zone warehouses with total grain stocking capacity over 100.000 tons.

In 1995, Ulusoy Un started exportation operations and it has exported flour to 88 countries so far. In 2017, the company accounted for 4% of the sector's exportation operations in Turkey. According to data announced by the Turkish Exporters Assembly in 2018; our company is the 487th company on the top 1000 Turkish exporters list and 6th on its sector list in 2017. According to data announced by the Istanbul Chamber of Industry in 2018, the company is the 444th company on the 2017 list of top industrial

manufacturers of Turkey and 5th on its sector in terms of sales out of total production.

The Company acquired 17% of SASBA\$ Samsun Serbest Bölgesi Kurucusu ve İşleticisi A.Ş. shares on March 28, 2013. This investment enabled Ulusoy Un to have an effective role in the management of Samsun Free Zone which is one of the most strategic locations by the Black Sea Region offering storage and logistics infrastructure required for improvement of transit foreign trade operations, particularly.

Ulusoy Un went public on 20.11.2014 and its shares are being traded at Istanbul Stock Exchange.

Ulidaş Tarım Ürünleri Lisanslı Depoculuk Anonim Şirketi, a 100% subsidiary of our company established on 27.02.2015, is an investment in the Licensed Warehousing system which is considered to be the future of agricultural sector.

At the end of the year 2016, first licensed warehouse with 41.950 tons constructed and has started its operations by buying license for 41.950 tons part on 16.06.2017.

Our affiliated company Rolweg SA that 100% belong to Ulusoy Un Sanayi ve Ticaret A.Ş. established on 15.03.2018 in Geneva, Switzerland.

Period of Flour Trade. Because of the limited flour

Development

factories in Black Sea Region, Ulusoy Gida started to buy flour from other regions and sell it to regional traders. Thus, he played an important role in the regional flour trade.

Transition into the Largest Food Distribution Company of the Black Sea. On the Black Sea coast, Ulusoy Gida became the most effective food distributor and marketing company.

Entry to the Sector by Partnership With Hasanusta Flour With the distribution strength of Ulusoy Gida, after 2 years of successful joint activity, partners decided to

establish Ulusoy Un with 60% Fahrettin Ulusoy shares.

Establishment of Ulusoy Un 180 tons/day capacity wheat factory became operational in

Samsun on 8 Jan

1991.

1990

Increasing Capacity of Samsun Factory to 500 tons/day

As a result of domestic and foreign demand, a second unit with 260 tons/ day capacity was built on the current factory area.

Establishment of 34,000 Tons **Capacity Warehouse** in Samsun

Warehouse was built 1.8 km from the port, and 2.5 km from the Samsun factory to increase raw material storage due to rise in production capacity.

Beginning International

Transit Trade In far east markets, favorable freight rates due to container reverse traffic provided flour export and transit wheat trade development.

Purchasing 17% of SASBAS Shares

Increased transit trade capacity created duty free zone storage capacity. As a result, a 17% stake in Samsun Free Zone Operator which had a 76,750 ton grain storage capacity, was purchased.

Commencement of Export and Import Activity Flour exports started to new countries as a result of the disintegration of the Soviet Union.

Raising Samsun Factory Capacity to 240 tons/day. By expanding the export markets an extra capacity need was felt.

MESSAGE FROM THE CHAIRMAN OF THE BOARD

Dear Shareholders,

Completing its 30th year in business, Ulusoy Un is managed by the experience, know-how and confidence brought in by the business life of our family that started with Ulusoy Gida in 1969 and grew with all our colleagues joining this family in the following years. These long years have added significant values to our family. Initially, we learned how important our business, food industry is and to attach the highest importance to the responsibilities inherent with this importance. As employees and managers of Ulusoy Gida group we made the golden rule of not producing or selling products we would not see fit for our own consumption and have adopted this philosophy as the essential priority of being a reliable food supplier.

With employees always open to novel ideas, working with team spirit and creating added value and management approach not compromising from its principles of quality, stability and confidence, Ulusoy Un started growing rapidly. With this approach it reached 900 tons per day capacity from its initial 180 tons per day capacity. As a reward of its hard work and acknowledgement of its clients, UIusoy Un started to take a place in 1000 Largest Industry Enterprises of İstanbul Chamber of Commerce starting in 1996.In November 2014, it became the first company to be quoted in the İstanbul stock exchange ever to achieve it in Samsun province and in its own industry. Finally,Ulusoy Un became 444th among largest 500 industrial enterprises in Turkey, with 5th place in its industry in the list which is announced in 2017. After long years of labor, I extend my gratitude to all that have played a part in this pride.

In 2018 our company has increased its revenues by 65% compared to the same period of the previous year with 2.984 million TL sales revenue. Company realized 209,5 million TL operating profit. We aim sustainable growth with our active risk management especially under hard conditions. As part of this policy, by using derivatives our company hedged itself againist fluctuations in FX market.

Ulidaş Tarım Ürünleri Lisanslı Depoculuk Anonim Şirketi which established in 2015, started its warehouse investment with 41.950 ton capacity in Alaca, Çorum in 2016. It has started its operations in licensed warehouse sector which is agricultural sector's future, by buying its license on 16.06.2017 with 41.950 ton capacity. By completing our ongoing licence warehouse investments in Yozgat Sorgun and Samsun, we aim to increase our total capacity in licence warehouse sector in 2018.

Our aim is to take the activities of our company to global level without compromising our principles, values and objectives together with our experienced colleagues with the strength of teamwork we achieved in our company. In line with these goals, we, Ulusoy Un family will work with all our strength. I thank all our past and future shareholders, employees, clients and suppliers who have played a role in this success.

Eren Günhan ULUSOY Chairman of the Board In 2018 our company has increased its revenues by 65% compared to the same period of the previous year with 2.984 million TL sales revenue. Company realized 209,5 million TL operating profit. We aim sustainable growth with our active risk management especially under hard conditions. As part of this policy, by using derivatives our company hedged itself againist fluctuations in FX market.

In line with the demands of both our domestic and global clients, we made sales with unconditional customer satisfaction principle without compromising quality and food safety. As a result, our company turnover rose from 170 million TRY in 2008 to 2.984 million TRY in 2018. Multiplying our turnover by 17 times in the past 10 years we realized an annual average 32% turnover growth.

MESSAGE OF THE VICE CHAIRMAN OF THE BOARD

Dear shareholders,

Ulusoy Un, was founded on this land from where, wheat, the rawmaterial of the holy bread was spread to the world. Born of this strong history of our country, from its people and potential, Ulusoy Un managed to achieve a significant place in both our country and the global industry within the past 30 years. Now we are proud to share this value with over 2700 shareholders who have become partners with our initial public offering.

With its 900 tons per day capacity in its two factories, Ulusoy Un completed the 4% of Turkey's flour export in 2018 where Turkey is the leading exporter. Our company became 487th company on the top of 1000 Turkish exporters list. With its direct sales, it became 444th among largest 500 producers according to İstanbul Chamber of Commerce data and 5th place in its own industry.

In line with the demands of both our domestic and global clients, we made sales with unconditional customer satisfaction principle without compromising quality and food safety. As a result, our company turnover rose from 170 million TRY in 2008 to 2.984 million TRY in 2018. Multiplying our turnover by 17 times in the past 10 years we realized an annual average 32% turnover growth.

In 2018, our company has achieved an important growth by increasing its revenue by 65% compared to the same period of last year. Our company has achieved 209,5 million TL operating profit from manufacturing and commercial activities. Company's risk management operates studiosly againist the fluctuations in FX markets. With our dynamic management, we are continuously producing staple food which has unended demand. By completing the first stage of our new Samsun factory investment, we will have an important capacity opportunity for growth.

I would like to thank our clients and employees who carried us to the top and did not hold back their support and to esteemed investors who placed their confidence in us by becoming partners after public offering. I wish 2019 to bring gains and happiness for our company. With its experience exceeding 50 years, Ulusoy Un will continue to create value for our partners, employees and clients...

What is Licensed Warehousing System?

Licensed Warehousing of Agricultural Products Act numbered 5300 entered into force when it was published on the Official Gazette dated 17.02.2005 and numbered 25730.

Licensed warehousing of following products is possible based on the Communiqués published under this Law:

- Cereals, legumes and oily seeds,
- Nuts.
- Cotion,
- Olive and olive oil,
- Dried apricot

Licensed warehousing can be briefly described as storing essential and processed agricultural products such as cereals, legumes, oily seeds, cotion, nuts, olive and olive oil and dried apricots, which are suitable for warehousing and can be standardized, in safe and healthy warehouses owned by licensed warehouse operators by established related standards and trading these products with electronic product certificates issued by these establishments.

Licensed Warehousing System is a common practice in countries included in the system all around the world such as Bulgaria and Romania and particularly in the USA, India and Australia.

Goals of Licensed Warehousing operations:

Preventing drop of prices caused during the harvest times due to increased supply of agricultural products and balancing the market,

- Allowing particularly small farmers and produce owners having financial troubles to obtain loans and financing from banks within the product certificates issued in return for the products delivered to the licensed warehouses,
- Using products having generally acceptance standards for trade of agricultural products, encouraging high quality production, creating a safe market environment,
- Documenting trade of agricultural products,
- Carrying on agricultural reform that is currently being implemented in our country and increasing participation of private sector in trade of agricultural products,
- Minimizing government interventions in production and pricing, assuring huge savings in terms of costly expenses paid in this segment and avoiding interventions impairing free market and prices,
- Enabling producers to achieve a stable and higher income level through a system that can be easily marketed as well as being well protected and having minimized transportation costs
- Providing a new investment tool to investors as an alternative to foreign currency, gold, share certificate,

interest and similar instruments,

- Allowing merchants and industrials in produce trade to easily supply products having quality confirmed based on scientific criteria and price stability,
- Trading agricultural products with product certificates or electronic product certificates without necessity of actually showing goods and samples,
- Transition of agricultural products to forward transaction and option markets with standardized product and licensed warehouse system,
- Creating new business areas for product storage, banking and insurance sectors,
- Enabling our country to have a crucial role in trade of agricultural produce in the nearby geographical areas such as the Middle East, Balkans, Turkic Republics and Asia.

RISK MANAGEMENT

SECTOR RISKS

Natural and Geographical Risks

Hail, frost, fire, drought, storm and flood are the leading natural risks related to agricultural production. Although Turkey has a great potential in plant production and animal production, it has not achieved desired levels of agricultural production. Accordingly, fluctuations in demand – supply balance might have impact on the prices and thus disturb profit margins of the Company.

Production mainly depends on natural conditions and this dependency might cause product yield and producer income, profitability fluctuations.

Our country is exposed to product loss risk due to bacterial, fungal and viral plant diseases and harms. Natural and geographical risks are defined as risks that cannot be fully foreseen and measured. However, the Company closely monitors the expected product harvests on regional and international level by bearing in mind the possibility of foregoing risks and increases the critical stock levels in order to prepare for potential raw material price increases to be caused by decreased product yields. Besides, the company manages the risk through derivatives on commodity exchanges. Political and Legislative Risks

Any changes on the government's agricultural policies and any changes that might narrow the profit margin might have negative impact on the Company's profitability since the main input of the Company, namely wheat, is directly controlled by the government's agricultural policies.

The global economic problems and potential product price fluctuations caused by such problems might have negative impact on the agriculture sector. Production mainly depends on natural conditions and this dependency might cause product yield and producer income, profitability fluctuations. Since the profit margins in the sector are low and a price oriented competition approach dominates the market, any potential increases on general expenses and production costs might have negative impact on the sector and reduce the profitability level. The company manages the political and legislative risks related to the sector with methods similar to the ones used for natural and geographical risks.

OPERATIONAL AND TRADING RISKS

Production Risks

This category covers process risks that might prevent producing products according to the expected quality level, contents and standards.

Foreign substances might be mixed with the product in production line on each stage and between stages while transforming wheat into flour by processing wheat as a raw material.

Another risk would be flocculation, molding and infestation on nooks and obsolete sections of production facilities, production team and equipment, packing – shipment and warehouses.

If the main production machines are broken, broken down etc., such problems might cause the risk of suspending production.

Magnets and waste purifiers are used at raw material

input processes in order to keep foreign substances away from related processes. Products are sampled and tested at specific stages in order to check quality. Employees are continuously and regularly trained on such matters; cleaning and control processes are supervised using "random sampling and period" methods. Besides, the critical points are determined (Final Check Sieve and Metal Detector) and risks related to these points are eliminated.

Machines are regularly maintained and repaired; the company does not wait for machine malfunctions to do maintenance and repair works and to replace spare parts; qualified teams quickly eliminate any malfunctions and problems.

There are comprehensive insurance policies against all kinds of machine breakdowns.

Human Resource and Work Safety Risks

There might be occupational health & safety risks related to any potential work accident and other risks related to failing to employ manpower that is fit for the job and that will not interrupt business continuity.

Personnel trainings on potential work accidents are offered regularly. Besides, an Occupational Safety Specialist is hired pursuant to the legislation in force.

The Company has a Human Resources Department that is in charge of risks related to inefficient use of manpower available and confusion about employee roles and responsibilities; the department continues to take effective measures, plan employee backups for key roles and positions as well as duly reporting to and informing the management.

Logistic Risks

This category covers operational risks in purchasing (supply), storage and shipment processes.

There is a risk of being exposed to operational risks related to the processes of transporting purchased raw materials to the Company warehouses, keeping them in stock and transporting from warehouses to the production or sales locations. Loss, spillage, accident and such other risks related to all transportation / shipment processes of the Company are covered under comprehensive insurance policies. Besides, there are insurance policies against losses and damages suffered at the warehouse due to flood, fire, burglary etc. Efficient internal control mechanisms are in place particularly for shipment and storage processes.

Sales and Marketing Risks

The risks are current account balances due to credit sales made to margin trading customers as well as bounced, uncollected checks-bills and such other bonds.

Another risk would be misconduct attempts of the personnel assigned as collectors on local fields.

The rivals might prefer to practice aggressive competition in the domestic market and new players might be introduced to the market.

RISK MANAGEMENT

The Company performs necessary market searches before offering credit (forward) sales, as required under the Company's risk policy, and a risk score as well as a limit are specified for customers offered with such sales. These specified risk and limit restrictions are applied to subsequent operations.

Inspectors, assigned to the locations where the Company is present in the domestic market, do inspections at random periods and with random samplings and comprehensive insurance policies are issued against the misconduct attempts.

The risks related to introduction of new players into the market and existing players practicing more aggressive sales policies are always in agenda and the Company's Sales and Marketing Department keeps up with the developments in the domestic market in order to be prepared for such risks.

Importation Risks

This category covers all kinds of risk related to importation markets.

Any crisis, amendment related to production and tax policies in the country of importation is considered as a risk.

The company determines and keeps critical inventory levels in order to prepare for such negative incidents.

The company keeps a close eye on the global crop expectations and monitors alternative importation markets as well as keeping alternatives as backup.

There are comprehensive insurance policies covering logistic risks in importation processes.

Exportation Risks

This category covers all kinds of risks related to exportation markets.

Anti-damping practices in countries of exportation as well as political, economic and conjectural instabilities and negativities in these

countries are the related risks.

Both in-house specialists and professional institutions of our sector take measures against the anti-damping practices.

The Company's Exportation Department always monitors the exportation markets and does active searches as well as keeping alternative

markets as backup in order to be prepared for the risk of conjectural, political and economic depressions in these markets.

FINANCIAL RISKS

Exchange Rate and Interest Risk

This category covers risk of exchange rate changes on assets and debts in foreign currency as well as cost and cash flow risks related to increased interest rate applied to the financial debts.

The exchange rate risk is a result of foreign exchange gap between the Company's liabilities and assets in foreign currency. There will be a foreign exchange gap if the liabilities in foreign currency are more than the assets.

Foreign exchange gap of our company is being effectively managed against fluctuation risk through Futures Exchange transactions and forward transactions at banks and we are able to transform them into foreseeable financial outcomes.

The position acquired changes based on market developm ents and hedging model applied.

Since there is a risk of sudden increase in variable interest rate of short and long term liabilities, the company's Finance Department closely monitors the market and keeps an open mind for alternative methods.

Raw Material Price Change Risk

This category covers the risk of wheat price changes in the internationally organized markets which might be disadvantageous to the Company.

The exchange rate risk is a result of foreign exchange gap between the Company's liabilities and assets in foreign currency. There will be a foreign exchange gap if the liabilities in foreign currency are more than the assets.

TMO (Soil Products Office) regulates the wheat prices in our country. There are different methods used to control the market in order to protect the producers when the prices go down and to protect the consumer when the prices go up.

According to the actual wheat position available in our inventory; the risks are limited through partial hedging transactions on Cbot (Chicago Board of Trade) and Matif exchanges at levels where the domestic wheat price and overseas exchange price spreads are widened.

Fahrettin Ulusoy took the floor and said, "I was pleased to follow the point that our company, which was founded in 1989, came today as a founding stakeholder. I would like to thank all the members of the board of directors, including Eren Günhan Ulusoy and Kamil Adem, and all

of my employees who have passed the test. We are able to perceive the point where our company is coming from the next studies. Our company Ulusoy, which is a small tea first, is now like a waterfall. As founders, I thank all the stakeholders and employees who provided us with this great happiness. Hopefully, we will be able to realize our bigger ideals at other general assembly meetings. Thanks to my life partner and our shareholder Nevin Ulusoy.

Nevin Ulusoy took the floor and said, "I am grateful to all of you, our stakeholders and valued junior, all of you with respect and affection, and I thank you all for your cooperation with our employees and stakeholders today. However, at a previous general meeting, one of our stakeholders suggested that at least one female member should be in the governing board. I would like to emphasize that I need to be more sensitive to this issue by repeating my vision in this direction insistently. Thank you, "he concluded his words.

Chairman Bihan ÖZTÜRK thanked the stakeholders. The meeting ended with the members of the Board of Directors wishing the success in their duties.

This report was issued on 5/4/2018 at 15:15 at the meeting place in 5 copies and read and signed.

CORPORATE SOCIAL RESPONSIBILITY REPORT

Ulusoy Un is aware of the qualified manpower need in Turkey and the company fulfills its social responsibility through sponsoring mainly educational projects as well as sports, economy and cultural projects.

Ulusoy Un Board of Director's Chairman Eren Günhan Ulusoy, who intends to establish social responsibility as a corporate culture, is a member of several social and professional societies. He is the Chairman of Turkish Flour Industrialists' Federation and Black Sea Region's

Flour Industrialists Association, Vice Chairman of Grain, Legume and Oilseed Exporters' Association of Black Sea and Vice Chairman of Samsun Commodity Exchange.

Ulusoy Un helps student who are eager and committed to have an education and thus offers non-refundable grants and internship to tens of students every year in order to create even a slight difference on knowledge and culture level of the young generations which are the engines of our society. Besides, our founding partner and board of directors' chairman attend to university meetings and seminars as well as allowing food engineering students to visit our factory and observe production processes so that university cooperation can be sustained.

Enterprises that are aware of their corporate social responsibility have always been a step ahead in terms of success and continuity. This awareness requires seeking assistance of non-governmental organizations in order to take proper action. Hence, we benefit from experienced of non-governmental organizations in our projects and achieve a more effective stance in our social responsibility approach. We leverage our social responsibility approach by assuring contribution of our employees, customers and stakeholders on each step of our projects. This allows us to take firm steps towards the goal of launching more effective, more comprehensive and more useful projects in the future.

CORPORATE SOCIAL RESPONSIBILITY

We came together with the madnetech clob of Bahçeşehir Science and Technology and Bahçeşehir Anatolian High School. As a matter of fact, everything started with the sincere letter sent by Miray, who is the FRC team leader to us in the name of Ulusov Un. They received prizes at several national and international tournaments. It was very pleasant to meet these young people who are ambitious, hard working and dedicated to science and technique. In addition to their own studies, they share their information with their peers studying at state schools, in the scope of social responsibility. We recommend you to check the instagram account @magnetech_ official to see the exciting achievements of the scientists and business people of the future. We were proud and became hopeful to hear these young people most of whom study on scholarship thanks to their achievements.

We are one of the constant donor of The Educational Volunteers
